TITLE:URBAN SETTLEMENT PLANNING

1.INTRODUCTION

To describes the global challenge of rapid,unplanned urbanization,especially in the global south where traditional,rigid planning fails. It argues for a shift toward flexible,participatory “in-situ upgrading” of informal settlements as a more sustainable alternative.

2.THE NAME OF PAPER AND AUTHOR’S NAME.

The name of the paper is “Incremental Urbanism” and Authors are Ananya Roy and Nezar AISayyad.

3.PROBLEM STATEMENT.

Unplanned settlements in urban areas brings several impacts and high risks to the citizens but till now no system for proper planning for housing and settlements in cities and other urban areas whereby citizens still suffer from poor provision of social services. This study addresses this problem by proposing a urban settlements and housing planning system for proper handling of human settlements and others physical infrastructures.

4.OBJECTIVES OF THE PAPER.

(i).To document and analyze the existing practices of incremental housing and neighborhood development by residents in informal settlements.

(ii). To propose a new conceptual and procedural frameworks for “Incremental Urbanism” that can guide planners and policymakers.

(iii). To identify key enablers (e.g flexible land tenure,modular infrastructures standards) and barriers like outdated regulations to implementing incremental planning.

(iv). To provide practical recommendations for integrating incrementalist principles into formal urban planning systems and municipal codes.

5. GAP OF THE PAPER.

The paper provides a powerful critical theory but offers little concrete guidance on what alternative planning practices or methodologies look like on the ground .It successfully deconstructs the old paradigm but only begins to construct a new one for the practicing planner or policymaker.
